

# Procedure To Follow For Unloading A Round Timber Truck

- 1-It is forbidden to uncable your load before the scale.
- 2-Leave the priority of the scale to those who have sample tests.
- 3-*Make sure you enter the correct information from your transport ticket into the computer.*
- 4-Unload your load on the right pile.
- 5-**The piles need to be equalized : see the photos below.**
- 6-The trailer clean-up must be done at the designated area and NOT AT THE PILE.
- 7-The personal protective equipments are mandatory.

**Warning :** The yard responsables can make you take back your pile if they judge that the pile is not according to the standards of Groupe Savoie.

## Non-correct

## Correct

\* We've been seeing a lack of quality in our piles lately and we need to re-emphasize that. Together we will succeed!  
Thank you for your cooperation.
